STARTUP FOUNDATIONAL AGREEMENT & LEGAL STRUCTURE

Document ID: LEGAL-FOUNDATION-2026-V1

Effective Date: August 21, 2026

Core Founders: Minaga Thasan (CEO) & Chief Technology Officer (CTO)

1. Equity Distribution & Cap Table

The initial capitalization structure of the entity is established as follows. This structure maintains majority control within the core founding team to ensure vision alignment and executive continuity.

Role / Designation	Equity (%)	Vesting Schedule	Voting Rights
Minaga Thasan (Chief Executive Officer)	**35.0%**	Founding Equity (Immediate)	Full Voting Control (Co-Majority)
Chief Technology Officer (Co-Founder)	**35.0%**	Founding Equity (Immediate)	Full Voting Control (Co-Majority)
Lead Full-Stack Developer	**15.0%**	4-Year Vesting (1-Year Cliff)	Non-Voting / Advisory Only
Lead Embedded/Hardware Engineer	**10.0%**	4-Year Vesting (1-Year Cliff)	Non-Voting / Advisory Only

Role / Designation	Equity (%)	Vesting Schedule	Voting Rights
Unallocated Equity Reserve (Option Pool)	**5.0%**	Reserved for Future Hires/Advisors	Company Vault

2. Governance & 51% Voting Majority Rule

To safeguard the company against operational disruption, hostile replacement, or premature takeover, the following governance rules are binding:

- **Executive Control:** The Core Founders (CEO & CTO) shall at all times retain a combined minimum voting share of **70.0%** (and never less than 51.0%), ensuring absolute voting control over all corporate decisions.
- **Board Resolutions:** Major strategic decisions, including IP licensing, corporate restructure, share issuance, and board additions, require a supermajority (>66.6%) approval from the Core Founders.

3. Equity Vesting Framework (4-Year Vesting with 1-Year Cliff)

All non-founding technical partners and future equity-earning team members are subject to a strict 4-year vesting schedule designed to protect company equity against early departure:

1. **1-Year Cliff:** Zero equity vests during the first 12 months of service. If a contributor departs before completing 12 consecutive months, 100% of their unvested equity option is forfeited back to the company.
2. **Post-Cliff Allocation:** Upon completing the 12th month, exactly 25% of the allocated equity shall vest. The remaining 75% shall vest incrementally on a monthly pro-rata basis over the subsequent 36 months ($1/48^{th}$ per month).

4. Intellectual Property (IP) Assignment & Confidentiality

Protecting proprietary algorithms, hardware blueprints, and firmware logic is critical to company valuation:

- **IP Ownership:** All code lines, circuit schematics, CAD designs, AI prompt engineering frameworks, and architectural models created by any contributor or engineer during their tenure belong 100% exclusively to the Company.

- **Non-Disclosure & Non-Compete:** All team members are bound by confidentiality obligations barring disclosure of trade secrets or developing competing hardware/software products during their tenure and for a period of 24 months post-separation.
- **Infrastructure Administration:** Access to core cloud accounts (AWS/GCP), GitHub Organization administrative roles, domain registries, and AI API keys remains strictly under the ownership of the CEO and CTO. Contributor access is granted via scoped permission levels only.

5. Repository Architecture (GitHub Setup Guidelines)

The company codebases shall be segmented into isolated repositories under the primary GitHub Organization:

Repository Name	Scope & Technology	Access Rights
hardware-firmware	Microcontroller code, C/C++, ESP32/Raspberry Pi logic, PCB layouts	Embedded Engineers, CTO, CEO
mobile-app	Parent Dashboard, Flutter/React Native, UI/UX screens, API hooks	Full-Stack Developers, CTO, CEO
landing-page	Next.js/React website, pre-order funnel, marketing scripts	Full-Stack Developers, CTO, CEO
ai-backend-service	Python/Node.js, LLM orchestration, voice low-latency streaming	CTO, CEO, Core AI Engineers
